**SUPPLEMENT TO
REPORT NO.**

25X1

1. Plans have been made for the construction of numerous radio stations for the sole purpose of interfering with the reception of Polish-language broadcasts from Western radio stations. Such radio stations already exist in Sopot (Q 55/Y 43) and in Oliwa (Q 55/ Y 43) and another is being built in Tczew (Q 55/ D 59). The method of interference was also changed. Heretofore, interference consisted of various crackling sounds (huczakow) repeated one after the other. At the present time, the various sounds are used simultaneously and without interruption during the period of the foreign radio broadcast.
2. The Polish Security Police (Urząd Bezpieczeństwa-UB) has a radio station in Gdansk (Danzig-Q 55/Y 42) which is five times more powerful than the regular broadcasting station in Gdansk.
3. A factory producing radio equipment is located in Dzierżonów (Reichenbach-P 51/J 08).¹ This factory was recently converted for the production of lamps and radar equipment. Production is supervised by Soviet engineers and is kept strictly secret.

1. Comments: Another report, date of information April 1952, stated that the Lower Silesian Radio Factory (Dolnoslaskie Zaklady Wytworow Radiowych) in Dzierzoniow was not producing radar equipment. This task was assigned to another radio factory which is located in Warsaw. The report stated that the factory in Dzierzoniow was producing only small Pioneer radio sets and precision measuring instruments.
